

COMPACT & JUST Wybot C2 Pro

The Wybot C2 Pro stands out for its sleek design, ease of use, and superior cleaning performance. It is equipped with a dual filtration system, ensuring optimal collection of both fine and larger debris. It's the ideal choice for owners of above-ground or semi-inground pools, offering excellent value for money.

Versatility

Engineered to accommodate all configurations.

Capable of surmounting obstacles and ascending slopes and steps, the Wybot C2 Pro guarantees thorough cleaning of every corner of your pool.

Double filtration

Ultra-efficient filtration for pristine water clarity.

Featuring dual filtration, the Wybot C2 Pro integrates a 180 µm basket to trap larger debris and an Ultrafine filter to capture the smallest particles.

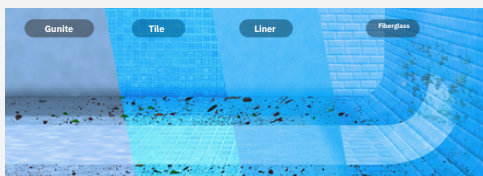

Cleaning Modes

Distinctive versatility for customized cleaning solutions.

Featuring seven distinct cleaning modes, the Wybot C2 Pro seamlessly adapts to your unique requirements. Whether addressing the bottom, walls, waterline, or an entire pool, each mode is engineered for optimal efficiency.

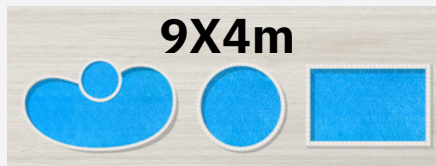

For what type of pool?

The Wybot C2 Pro adapts to all pool surfaces: tile, liner, concrete, or shell, for a perfect clean.

The Wybot C2 Pro offers 3 cleaning programs: floor, walls, or floor + walls, selectable with a single button on the robot, for maintenance tailored to your needs.

The Wybot C2 Pro adapts to all pool shapes: rectangular, round, oval, or free-form, for efficient cleaning everywhere..

When connected to the Wybot app, the user can access specific movement paths: 5 patterns for the floor and 3 for the walls.
