

## Osprey 200

Specifically designed for cleaning the bottom of flat-bottomed above-ground pools, it ensures effective maintenance with no effort.

With 50 minutes of battery life, dual motorization and a 180µm filter, it vacuums up dirt, sand, and leaves even in the smallest corners.

It detects walls, reverses automatically, and returns to the edge at the end of its cycle. Fully recharges in 3–4 hours. Compatible with all types of flat-bottomed pools

Versatility

### Compatible with all flat pool floors

The Osprey 200 robot is suitable for all flat-bottomed pools, whether above-ground or in-ground. It adapts to all surfaces (liner, tile, PVC, vinyl) and all shapes (round, rectangular, etc.).

Efficiency

### Deep cleaning

Thanks to its dual motorization, two powerful scrapers, and 180µm filter, it efficiently vacuums dirt, leaves, and sand for a crystal-clear pool.

Lightness

### Ultra-light, easy to handle and cordless

Weighing just 3.6 kg, it can be carried with one hand, easily removed from the pool using the provided hook, and fully recharged in 3 to 4 hours.

Automatic  
Docking

### Wall detection and automatic return

The robot automatically reverses when it touches a wall. At the end of its cycle or in case of low battery, it intelligently returns to the pool edge for easy retrieval.

**Pool size: up to 50<sup>2</sup>**

The Wybot Osprey 200 weighs only 3.6 kg, can be carried with one hand, and is easily removed using the provided hook.

The Wybot Osprey 200 adapts to all pool shapes – rectangular, round, oval, or freeform – for efficient cleaning everywhere.

### TECHNICAL SPECIFICATIONS

Cleaning Coverage	Floor
Use / Charging Time	max. 50min / 3h
Filtration	180µm Filter
Weight & Dimensions	3,6kg - 34(L)x35(l)x33(H) cm
Motor & Power	30W
Suction Flow & Speed	8,1m3/h - 19,8m/min
Battery Power	25.2V   2600mAh
Mobile App	✗
Water Depth	2,1 m

#### Included in the package

- Robot
- User manual
- Quick start guide
- Hook + Handle
- 2 x Scrapers

24 MONTH  
WARRANTY
